

Didjeridu Blanks Available

1. General information

Blanks are collected from central NSW usually in autumn when the sap is not active in the trees. The trees collected are only ***genuine termite hollowed***—we do not bore out the blanks to make them useable. We collect mostly Mallee, but there are Box Tree blanks available also.

2. Seasoning

Blanks are sold well seasoned (at least 6 months), unless otherwise requested. We leave the bark on them so they season slower.

3. Size

Our blanks come in all shapes and sizes—just like people! We collect them in varying lengths and leave them just as they grew in the natural environment, but we can cut to length for a fee. Generally they will be between 1.1m and 2m long, but most are around 1.5m to 1.6m in length.

4. Cost

Mallee blanks are **\$50 each**. We also offer special blanks that are best handpicked. These are individually priced from \$70 to \$250. The higher priced ones are generally nice shaped Grey Box or Mallee blanks.

5. Quality control

We make it a point to ensure that all our blanks have a good sized, natural hole down the entire length of the stick. We do our best to check that this is the case with every blank, but also know that we cannot always see down the whole length due to bends. Because of this ***we offer 10% extra with our orders***. So for 10 we give you 11, or for 30 we give you 33 etc. For orders of less than 10 we of course cannot do this. I have seen some pretty bad blanks in my time and do not wish to sell even one bad one, so we are really open to working with you to make sure that you are happy with the product, and want to come back again to us as your supplier.

6. Types and categories available

We sell both Mallee and Box tree blanks. The Box tree blanks are mainly Grey Box, but sometimes these trees are really hard to identify, so there may be some Black Box and Bimble Box in there too. We sell in two categories—Standard blanks (\$50) and special, individually priced blanks for those who want to make that special didj. We do not recommend customers buy the premium blanks until they are confident and competent as didgeridoo makers, just because it is a lot of money invested to lose if their blank is damaged!.

7. Beeswax

We are able to supply natural, raw beeswax if you have a need for this. We recommend that beeswax be used to form the mouthpieces. We can supply this at \$20 per kg.

8. Delivery

We are based on the Mid North Coast, and can arrange for pick up from here, or can deliver for a fee, depending on your location. Talk to us about it when you make your order and we can work it out then.

9. Pictures

Below are some pictures to give an idea of the range and appearance of our blanks.

Mallee Blanks
